

Magifa Zaanstad is specialized in the production and assembly of precision mechanical products. Our customers are working in the Semicon, Oil & Gas, Medical and Aerospace markets.

We Are looking for a Conventional Turner

Production is in both proto and small to medium-sized series. Challenging due to special materials and its high precision. We are looking for a Conventional Turner. You are responsible for producing complex products, all based on drawings and technical descriptions. You'll have to determine the most efficient production method. You ensure that all products are well prepared and will meet the customers' requirement.

What do we expect;

- You are an enthusiastic and proactive professional who works very decisively and independently.
- You have knowledge of modern processing techniques and surface techniques.
- You have good knowledge of materials.
- You have good communication skills.
- You are a real team player and go-getter.
- Preferably someone with experience in a similar position within the metal industry.

What we offer;

- Full-time job
- with good salary
- permanent contract
- good secondary employment conditions / collective labour agreement for Metalektro

You will work within a professional, modern and fast-growing company. We work with PDC software. Within Magifa Zaanstad there are multiple opportunities for personal initiative and development. You can count on enthusiastic colleagues who provide a dynamic and informal working atmosphere.

You can send your application to;

Mr. I. Koehoorn E-mail: i.koehoorn@magifa.nl

Acquisition in response to this vacancy is not appreciated.
